

Intelliscore PlusSM

Make critical
business decisions
with confidence

Dramatically improve financial results and efficiency with Intelliscore Plus,SM Experian's strongest business score that provides breakthrough performance in identifying risky accounts. Now you can draw on the power of Experian's commercial and owner data to make critical credit decisions through a streamlined single-inquiry process.

Optimize decisions with enhanced predictive models

Having access to the most predictive business scores is critical for companies to make quick, reliable credit decisions and manage portfolios.

Experian[®] has created one of the industry's most powerful tools for fast and accurate risk assessment. Intelliscore Plus is a predictive powerhouse that uses advanced statistical techniques and accesses more than 800 commercial and owner variables, including tradeline and collections information, recent credit inquiries, public filings, new account activity, key financial ratios, as well as other performance indicators, to give you an unparalleled view of your prospects and customers.

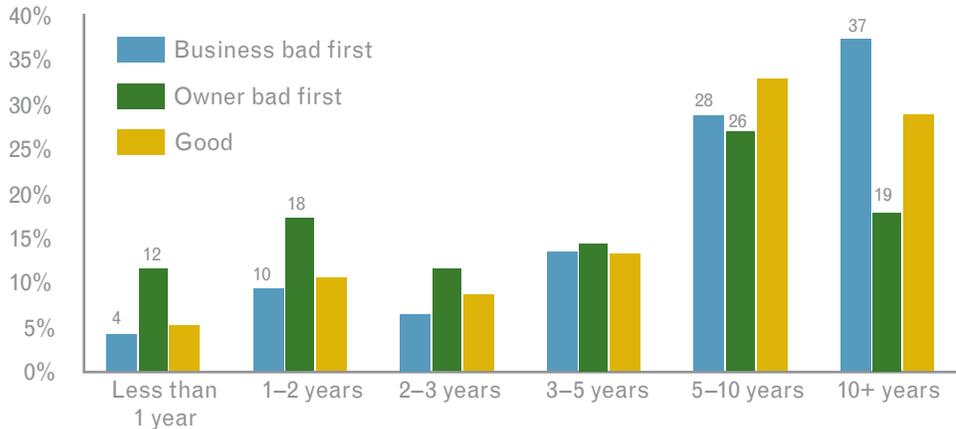

Assess risk more accurately with blended data

Recent studies have shown that when determining the risk potential of small businesses, evaluating both business and owner credit performance is more predictive than employing a commercial or a consumer risk model alone.

Drawing upon blended data, Intelliscore Plus helps address a credit industry dilemma: Which goes bad first, the credit history of the business or that of the business owner? In fact, the leading indicator of distress varies by business age and size, with business scores deteriorating first more often than owners' scores for businesses with more than 10 years' experience. The numbers reverse for businesses with less than five years' experience.

Relationship of business credit to business owner's credit

Distribution of businesses by years in business

As more business owners leverage their personal assets to meet business obligations, reviewing personal credit histories along with commercial credit information is a prudent practice that is permitted under the Fair Credit Reporting Act.

While optimal results are generated with blended credit information, Intelliscore Plus also provides highly predictive scores on the business or the owner. You choose whether to request a commercial-only score or a blended score based on the information included in your inquiry. Whether the results are blended, you can count on Experian's industry-leading information to provide unparalleled insight, precision and flexibility for evaluating financial health.

Leveraging the power of the Experian edge

Experian's modeling and scoring capabilities that enable Intelliscore Plus are just one component of the

Experian edge. The Experian edge consists of five core elements that allow us to be the superior commercial credit provider.

1. Data sources
2. BizSourceSM and TrueSearchSM
3. Business Identification Number
4. Corporate Linkage
5. Modeling and scoring

How to read the Intelliscore Plus report

1. Company information

Key information, including business name, address, phone number, Experian Business Identification Number (BIN), date the company's file began in the Experian database, year of incorporation and Standard Industrial Classification (SIC) code. The report displays the primary name and address and also may display the name and address most closely matching your inquiry.

2. Owner/Guarantor information

Name and address associated with the proprietor of the business. Report may list up to four owners/guarantors.

3. Full report number

Use the full report number within the same business day to receive the Business Profile Report and/or the Business Owner Profile at a discounted price. These profiles will provide insight into the detailed payment performance and public record information for this company.

4. Corporate Linkage

When the inquired-upon business is part of a corporate family, an indicator notifies users the business is a member of a corporate family. Users can quickly request to see the linkage details available in the Business Profile report by clicking on the link.

5. Intelliscore Plus

A statistically based credit risk score that can combine business and proprietor credit data to predict the likelihood of serious delinquency in the next 12 months. Scores range from 0 to 100, where lower scores indicate higher risk.

6. Factors lowering the score

Indicates the factors most influential in lowering the score from a top value of 100.

7. All-industry risk comparison

Determines the percentage of businesses that have a higher likelihood of becoming severely delinquent compared with this business.
